

## Chairman's Message

It gives me immense pleasure to introduce KAKKU. It has started with my vision of making India self reliant for products which were being imported and started our endeavour as an Import Substitution company.

For the last over five decades, our group has been able to maintain the image of being a Symbol of reliability. I am proud to say that we are one of the rare engineering companies in the world having a wide range of products under one roof catering to a large range of customers from Steel plants to Mines, from Power plants to Cement plants and Railways, among others.

Our team across the country makes us deeply associated with our end Customers, enabling us to have a better understanding of Customers' needs and fulfilling them with best quality products and services, With massive experience and strong in-house Systems, I am sure that the group holds a very bright future and that it will always remain a symbol of reliability in the years to come.

I humbly thank all our Customers for their continuous patronage and trust reposed on us for so many years along with our Associates and the complete team at **KAKKU E & P Control Private Limited (Previously Known as Electronic & Power Control Company)** for their contribution towards the establishment and growth of our Company and wish them all the very best for the future.

**(Rajesh Bahadur Mathur)**
